

Standard Deburring - B Tool Sets

Applications

Cross-Hole Both Edges

Hole Edge

Straight Edge

Standard-duty deburring tool sets are specially designed to handle daily deburring operations which require normal and average force for typical applications. All sets contain replaceable B-series blades.

mango II

Extra-Close

Sets for extra-close jobs and applications when you need to get right up to the work piece. Mango IIB + 4 Set contains 4 HSS standard-duty B blades for the 3 most popular applications.

B10

High quality ergonomic handle designed for heavy duty applications.

Safety Lock

Includes safety lock to prevent losing blades while working.
